Response to Arguments

1. Applicant's arguments filed 06/21/04 have been fully considered but they are not persuasive. Applicant argues that Koch samples an object and that Frisken samples a distance field. However, the claim says "generating an adaptively sampled distance field from the range data". In the specification on page 7, 2nd paragraph, it state's " An adaptively sample distance field (ADF) can be generated by adaptively sampling the object's shape". Koch discloses scanning object and converting that distance to the representation of the object in column 3 lines 45-55. In column 21 lines 60-68 and column 22 lines 1-6, Koch discloses how this scanning cab be adaptive. Therefore, Koch adaptively samples the object's shape, which is the applicant's procedure for generating the adaptively sample distance field.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Koch, U.S. Patent No. 5,218,427.

4. As per claim 1, Koch discloses a method for converting range data of an object to a model of the object (column 3 lines 47-55 and figs 1 a&b), comprising: generating an adaptively sampled distance field from range data (column 22 lines 1-6); and editing (sampling higher densities at certain regions, like edges, depending on how much detail the user wants is editing, column 22 lines 4-6) the adaptively sampled distance field to produce the model (column 22 lines 20-25).

5. As per claim 2, Koch discloses converting the adaptively sampled distance field to a triangle model (column 22 lines 20-25 and figs 18 a&b).

Allowable Subject Matter

6. Claims 3, 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
